DETAILED ACTION

Claim Objections

Claims 14-15 are objected to because of the following informalities: The claims are improperly drafted. The dependency of the claims should be stated at the preamble of the claim. Correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-12, 14-18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8-12, 14-18 and 20 recite, "lateral". This term lacks antecedent basis in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 8-11, 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Mitsutoshi et al. (JP 10084014).

Regarding claims 8, and 18-20 Mitsutoshi discloses a device comprising a chip (See figures 1 and 8) having electrodes 52, a substrate 11 having an interconnect pattern 12; and an adhesive 21; wherein said electrodes and said interconnect pattern are electrically connected; and wherein said adhesive has a first portion interposed between a surface of said substrate on which said interconnect pattern is formed and a surface of said chip on which the electrodes are formed, so as to cover all of a lateral surface of said semiconductor chip; and a second portion (Portion of the adhesive not beneath the chip) having a thickness greater than said first portion.

Mitsutoshi also discloses an adhesive with conductive particles 22 (**Claim 10**) substantially covering the lateral surface of the chip (**Claim 9**). See that the prior art's adhesive covers the interconnect pattern entirely (**Claim 11**).

Mitsutoshi also teaches:

- At least part of said second portion having a thickness substantially the same as the chip (**Claim 16**)
- Each of the electrodes including a bump 32, and wherein a part of said second portion contacts the lateral surface of the chip but not a lateral surface [any surface] of the bump (**Claim 17**)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim **12** is rejected under 35 U.S.C. 103(a) as being unpatentable over Mitsutoshi in view of Canning et al. (US 5783465).

Mitsutoshi fails to teach a shading material. See that Canning teaches a shading material "pigment" (Col. 5, lines 14+). It would be obvious to combine the teachings of Canning to the teachings of Mitsutoshi in order to provide shielding against reflected light.

Claims **14 and 15** are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitsutoshi.

Regarding claims **14 and 15** official notice is taken that is well known to use a PCB/PWB as the circuit board. It would have been obvious to combine the invention of Mitsutoshi with the well-known invention because it would provide a circuit board.

Response to Arguments

Applicant's arguments filed 11-14-01 have been fully considered but they moot in view of the new rejection above.

Conclusion

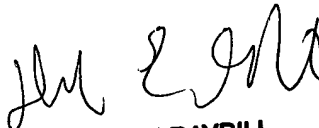

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lourdes C. Cruz whose telephone number is 703-306-5691. The examiner can normally be reached on M-F 8:00- 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Talbott can be reached on 703-305-9883. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
